EACH TIME BEFORE USING MACHINE

This machine should only ever be used by a trained and competent person.

Upon acceptance, please check the machine has in no way been damaged in transit and works, and each time prior to use. If you have any questions or doubts, please contact us, also in the event of breakdown or damage.

Please check that all safety mechanisms and switches are intact and working correctly.

Please check every day that all belts, bearings and moving parts are in good condition which could lead to breakage or even injury.

USING THE MACHINE

This is a dry only vacuum and should never be used for wet or on damp applications. We recommend initially, starting the vacuum outside after first sharply depressing the top spring-loaded handle a few times. This will remove any accumulated dust unsettled during transportation from the motor housing. Flick each switch to power up each of the vacuum's 3 motors: to stop the vacuum, flick the switches back in the opposite direction. Connect the vacuum to the machine or to the floor attachment. Please empty the machine regularly by cable-tying the bottom and top of 'the sausage', cutting the bag and so allowing you to empty it without coming into contact with the dust.

Please avoid vacuuming screws, nails, staples and swarf which if sucked up are likely to puncture the filter.

If the vacuum loses suction, ensure that the hose is unobstructed throughout its length and that the bag underneath is fastened securely and fits snugly to the body of the vacuum with an airtight grip. If the vacuum is throwing out dust from the motor housing, it is likely that the bag has over-filled and so dust has backed up into the housing. In such an event please call Multi-Hire for further instruction.

Please fully empty the vacuum prior to returning or off-hiring, otherwise a waste charge will be incurred.

AFTER USING AND PRIOR TO RETURNING THE MACHINE

Please ensure that the machine is unplugged and kept in a safe place.

An off-hire will never be arranged at the beginning of the hire period. Please call the office and arrange collection as soon as you know when the machine/machines will no longer be required.

Please make sure the machine is returned in a fit and clean state to avoid charges.

If multiple machines are being collected, please have them placed neatly together, ready to collect because time may be charged if we have to search or wait for equipment. Items not available for collection will remain on hire and additional collection charges will apply. If the machine is to be collected by a carrier, please ensure it's strapped securely to the pallet using the straps that it arrived with and is left somewhere obvious and preferably arrange for someone to be responsible for supervising the collection.

All information above is provided for guideline purposes only. For more accurate and reliable information please refer to the manufacturer.
